

Patient Empanelment Report

Each IHCRC patient is assigned, or empaneled, to a certain provider. Our goal as your medical home is for you to see your assigned provider on all or most of your clinic visits. If your assigned provider isn't available, we schedule you with one of your provider's team members. This encourages a better patient-provider relationship by establishing good communication and trust between you and your provider.

In a study of 2020's patient visits, we learned that an average of 85% of the patient visits were with their assigned provider. If the provider was unavailable, the patients saw the provider's team between 78% and 95% of the time.

IHCRC is proud to serve as a medical home to our patients. We believe that being your medical home results in better, more coordinated, patient care for you.
